Subject: Final Review of AMR Environmental Forum Executive Summary and Report
Attachments: AMR Env Forum Report combined_11012018.docx; 20181031envAMRBriefing_v8.docx

Dear Susan

Previously you reviewed and provided comments on these documents. We incorporated your feedback, along with feedback from the meeting co-organizers: UK and Wellcome Trust. We are sending this to you now for a final review. Below are a few notes about changes:

1. The Executive Summary
 - a. Changes were made to ensure all topics are covered, including meeting discussion, and to clarify the language for a non-expert audience.
 - b. We are clarifying the "Key Points" section with the co-organizers. The bulleted points will reflect what is in the summary, so wanted to send summary to you now so you can start reviewing. We will send the key points to you in the next day.
2. The Scientific Report
 - a. All bullets under "Addressing Knowledge Gaps" were edited to be identical to changes in the Executive Summary. These are shown as track changes (relative to the final version we agreed upon) and can be found on pages 7, 38, and 57.
 - b. A paragraph about AMR from agriculture potentially affecting human health was added to the scientific report. This was identified as an omission that needed to be filled since this topic was discussed at the face-to-face meeting. This paragraph can be found on Page 29.

If you would like to discuss any of these changes, I would like to arrange a call on Monday.

Thanks,

Jean
